Professional Summary

Dynamic and detail-oriented Software Engineering student at Noakhali Science and Technology University with hands-on experience in Flutter, Java, Node.js, Laravel, PostgreSQL, and full-stack application development. Passionate about building scalable software systems, solving real-world problems, and contributing to innovative engineering teams. Strong background in competitive programming with leadership and teamwork experience.

Education

Noakhali Science and Technology University 2021 – Present

B.Sc. in Software Engineering | CGPA: 3.53

Birshreshtha Munshi Abdur Rouf Public College 2021

Higher Secondary Certificate (Dhaka Board) | GPA: 5.00

Sadar Narottampur High School 2019

Secondary School Certificate (Cumilla Board) | GPA: 5.00

Technical Skills

Programming Languages	Flutter, Dart, Java, C, C++, JavaScript, PHP, Python
Frontend	Flutter, React
Backend	Node.js, Laravel, Serverpod
Databases	PostgreSQL, MySQL
Developer Tools	VS Code, IntelliJ IDEA, Eclipse, Git, GitHub
Concepts	OOP, REST API, Authentication, Role-Based Access, MVC

Projects

NSTU Medical Center Oct 2025 – Jan 2026

Flutter, Serverpod, PostgreSQL

- Developed a healthcare platform integrating patient records, prescriptions, and laboratory services.
- Implemented secure role-based access control and medical record management.
- Built responsive Flutter applications for web and mobile platforms.

GitHub Deployment: Mobile UI | Web UI

QuickBite Food Delivery App Jan 2026 – May 2026

Flutter, Node.js, PostgreSQL

- Developed role-based food delivery platform for customers, restaurants, and delivery partners.
- Implemented authentication, order tracking, and approval-based access control.

GitHub

JobLink Professional Platform Apr 2026 – Present

React, Laravel, MySQL

- Developed LinkedIn-inspired networking and job portal platform.
- Implemented user profiles, job posting, and application systems.

GitHub

Music Player Jan 2026 – Present

Flutter, Node.js, PostgreSQL

- Developed modern music player application with offline and online support.
- Implemented playlist creation, equalizer, and customizable themes.

 [GitHub](#)

Super Mario Game

2026

Java Swing

- Developed a retro-inspired 2D platform game with multiple levels and enemies.
- Implemented collision detection, enemy AI, boss fights, and scoring systems.

 [GitHub](#)

Run Booster

2026

Java Swing

- Developed a 2D side-scrolling platformer game with jump, run, and boost mechanics.
- Integrated speed boost effects, sound systems, and retro background music.

 [GitHub](#)

Competitive Programming

#	Platform	Handle	Achievement
1	Codeforces	scorpionspy	Max Rating: 1200 150+ Problems Solved
2	CodeChef	minhaj_3002	100+ Problems Solved
3	LeetCode	mahamudminhaj2003	100+ Problems Solved

Achievements

#	Achievement	Year	Event / Organizer
1	2nd Runner-up, Programming Contest	2025	NSTU Intra University Programming Contest
2	1st Place, SRS Poster Presentation	2024	IT Club, NSTU
3	5th Place, Programming Contest	2022	Inter University Contest, NSTU EEE DAY
4	6th Place, Programming Contest	2022	ICE TechCombat

Personal Information

Father's Name : Mohammad Solim Ullah

Mother's Name : Sajeda Begum

Date of Birth : 22-08-2003

Nationality : Bangladeshi

Marital Status : Married

Blood Group : A+

Languages

- Bengali — Native
- English — Professional Proficiency
